

Zeeshan Ahmed

Front-End Developer · React | Next.js | TypeScript

Islamabad, Pakistan | +92 335 332 0246 | dev.zeeshanahmed@gmail.com | zeeshanahmed.vercel.app | [LinkedIn](#) | [GitHub](#)

Professional Summary

Front-End Developer with 2.5 years of production experience and 7+ shipped products, several owned end-to-end as the sole frontend developer. Experienced in building scalable, responsive, and cross-browser compatible web applications using React.js, Next.js (SSR/SSG), and TypeScript, with additional hands-on experience in React Native and backend development (Node.js, Express.js, MongoDB). Skilled in REST API integration, reusable component architecture, RBAC systems, real-time features, performance optimization, SEO-friendly development, and i18n with RTL localization. Contributed to ioMoVo, an AI-powered enterprise DAM platform showcased at IBC Show 2024, Amsterdam.

Skills

Frontend: HTML5, CSS3, SCSS, LESS, JavaScript ES6+, TypeScript, React.js, Next.js SSR/SSG

Backend: Node.js, Express.js, MongoDB

Libraries: Redux Toolkit, TanStack Query, Zustand, MUI, Ant Design, Tailwind CSS, Bootstrap, ShadcnUi, Radix UI, Framer Motion, Socket.io, React Hook Form, Jest, React Testing Library, Recharts

Tools & Quality: Git, GitHub, REST APIs, Vite, Chrome DevTools, Firebase, Clerk, Figma, Vercel CI/CD, ESLint, Prettier, Husky

AI-Assisted Development: Claude & Claude Code, Cursor, ChatGPT/Codex, GitHub Copilot, Google Antigravity IDE, AI-assisted debugging, refactoring, and test generation

Practices: Performance optimization, Responsive web design, Cross-browser compatibility, SEO-friendly development, Web Accessibility (ARIA, semantic HTML, screen-reader testing), Lazy loading, Code splitting, Query caching, i18n & RTL localization, Agile/Scrum.

Work Experience

Front-End Developer — *IR Solutions, Islamabad, Pakistan*

Jun 2025 – Present

- Delivered 7+ production web applications using React.js, Next.js, and TypeScript, including a CRM and business platform, a digital loyalty rewards system, a community learning admin panel, and a real-time multiplayer quiz app — owning architecture, REST API integration, and deployment.
- Designed reusable components and feature-based folder structures, while managing server state with TanStack Query and client state with Zustand across multiple products.
- Implemented role-based dashboards with protected routing and granular per-module permissions across 15+ modules, plus real-time Socket.io notifications.
- Improved application performance through lazy loading, code splitting, query caching, and responsive UI optimization, while maintaining code quality with TypeScript, ESLint, Prettier, and Husky.
- Collaborated closely with UI/UX designers and backend engineers to translate business requirements into intuitive, accessible, and production-ready user interfaces.

Front-End Developer — *XtecSoft, Karachi, Pakistan*

Jan 2024 – Mar 2025

- Contributed to **ioMoVo** — an award-winning AI-powered digital asset management platform — showcased at **IBC Show 2024, Amsterdam**, serving enterprise clients around the world.
- Built the **ioPortal** module end-to-end, enabling users to create shareable portals with secure file management, rich preview capabilities, and granular role-based access control.
- Led the migration of the entire codebase to **TypeScript** and spearheaded major version upgrades (React 16→18, MUI 4→5), improving type safety, reducing runtime errors and accelerating developer onboarding.
- Refactored legacy class-based components into modern React functional components with hooks, improving rendering performance and long-term maintainability.
- Implemented RTL layout support and multilingual localization, expanding platform accessibility for Arabic-speaking markets.

Education

Intermediate (HSC) in Computer Science

Govt. Dehli Science College — Karachi, Pakistan

Jun 2021 – Jun 2023

Website Development (Full-Stack Certification)

Saylani Mass IT Training — Karachi, Pakistan

Dec 2022 – Dec 2023

Community Software — Content Management System (CMS) & Admin Panel

community.scalezy.com

Sole Frontend Developer · React, TypeScript, Vite, Ant Design, Tailwind CSS, TanStack Query, Zustand

- Built a custom Content Management System (CMS) and admin dashboard from scratch for managing courses, workshops, communities, members, lessons, quizzes, and digital content..
- Engineered a multi-step drag-and-drop course builder for creating and organizing modules, lessons, and quizzes, with Quill rich-text editing and file-upload management..
- Built searchable, sortable, paginated, and virtualized management interfaces with debounced search, TanStack Query caching, and optimistic updates.
- Owned frontend architecture, REST API integration, responsive UI, performance optimization, and end-to-end deployment.

Movix — Search & Discovery Platform (*Hackathon Project*)

movie-discovery-platform.vercel.app | github.com/zeeshanahme-d/Movies-website-react.js

React.js, Redux Toolkit, React Router, SCSS/SASS, JavaScript, TMDB API

- Built a responsive discovery platform that consumes the TMDB REST API with search, filtering, listing, and detail-page functionality.
- Implemented reusable UI components, Redux Toolkit state management, and client-side routing for dynamic data-driven pages.
- Improved frontend performance through lazy loading, infinite scroll, and optimized dynamic content rendering.

Stampy — Digital Loyalty Rewards Platform

stampyapp.me

Sole Frontend Developer · React, TypeScript, Vite, Ant Design, Tailwind CSS, TanStack Query, Zustand, React Hook Form, Stripe

- Built two production web applications from scratch for business owners and branch managers, owning frontend architecture, development, REST API integration, and deployment.
- Implemented authentication, business onboarding, Stripe payment integration, and CRUD workflows for branches, staff, campaigns, and rewards.
- Built responsive analytics dashboards and optimized application performance through lazy loading, code splitting, and query caching.

Partner Portal — Business Management & CRM Platform

partner.irsolutions.tech

Sole Frontend Developer · React, TypeScript, Vite, Ant Design, Tailwind CSS, TanStack Query, Zustand, Socket.io

- Built and owned a production role-based CRM platform with end-to-end frontend architecture, REST API integration, deployment, and full CRUD workflows across 15+ modules for leads, clients, partners, projects, milestones, and payouts.
- Implemented a granular RBAC system with multiple roles and per-action permissions, dynamically controlling routes, modules, actions, UI elements, and dashboard visibility for different users, along with analytics dashboards and real-time notifications.
- Improved performance through lazy-loading routes, code splitting, and TanStack Query caching.

Saudi Taxi — Online Taxi Booking Platform

sauditaxi.online

Sole Frontend Developer · React.js, TypeScript, Tailwind CSS, React Router, WhatsApp API

- Developed a fully responsive taxi booking platform tailored for Umrah and Hajj travelers, covering route, vehicle, and passenger selection.
- Integrated the WhatsApp Business API to enable instant booking confirmations and real-time communication between drivers and passengers.
- Delivered a clean, accessible UI using Tailwind CSS, achieving consistent performance across mobile and desktop viewports.
